

A simpler way to finance your home build?

Yes! Our all-in-one loan, team support and *Built* tool make it easy.

Building or renovating your home is easier than ever with our All-in-One Custom Construction Loan. It blends short-term construction and permanent financing into one loan. That means you'll have just one set of closing costs, saving you money *and* protecting you from rising interest rates.

We'll guide you from the loan application process through completion of your build. Count on your loan officer to be a consistent resource, and once your loan is approved, you'll have a dedicated custom construction team to support you. Talk to a real person or use Built, our online platform, to easily access the entire loan process, request loan draws, see key dates, check project status and more.

With all-in-one financing, you may:

- Include the land or lot purchase into your home loan.
- Borrow up to 95% of the home's value.
- Receive up to a 15-month term during construction.
- Choose fixed or adjustable rates.
- Benefit from an interest rate reduction based on the market rate when construction is completed.
